Confirmation of Evidence to be used in Teacher Assessed Grades

This document provides a summary of the range of evidence that will be used to help form your Teacher Assessed Grade in each individual subject. This evidence has been chosen as it offers a broad coverage of all the Assessment Objectives, based on the range of the specification that has been taught. The evidence has been reviewed through our internal quality assurance processes. Consideration of the conditions under which the evidence was completed has also been applied. Ideally, the evidence used will be consistent across the class or Year Group. However, this may not always be the case if, for example, a student has missed some teaching, or one or more assessments, for valid reasons. Any necessary variations for individual students have been recorded and students will be notified. This process follows the guidance set out by JCQ and Ofqual.

Subjects have used a variety of evidence. There is no minimum or maximum requirements as to the amount of evidence that has to be used to help make the decision, hence the different levels of evidence used between departments.

Please remember that the grades you achieved for these pieces of evidence will not necessarily equate to your TAG. The final decision on the TAG grade is based on the professional judgement of teachers as to where your work best fits against the Grade Descriptors released by JCQ for Summer 2021. Teachers cannot notify you of your TAG before the summer results day.

Parents were notified of the need to inform us of any circumstances that may have affected your performance since the start of your exam course and that we were unaware of. The necessary considerations that may arise from such circumstances will be applied accordingly and reviewed as part of our internal quality assurance processes.
